RESIDENTIAL AND COMMERCIAL PEST & WILDLIFE CONTROL

AUGUST / SEPTEMBER NEWSLETTER

Warm temperatures and recent rain have created ideal conditions for pests in Central Iowa. Now is the perfect time to protect your home before fall arrives.

PROTECT YOUR HOME

PROTECT YOUR FAMILY

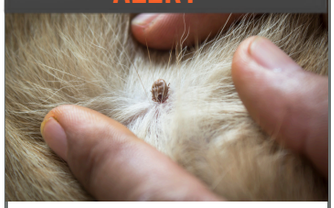
PROTECT YOUR PETS

WET SUMMER MEANS PEAK PEST SEASON

WASP SEASON IS HERE

Late summer is when wasp colonies are at their largest and most active. As food sources become scarcer, wasps often become more aggressive, increasing the risk of painful stings.

MOSQUITO & TICK ALERT



Warm, wet weather has led to a spike in mosquitos and ticks across Central Iowa.

- Ticks can spread Lyme disease, echrichosis and other illnesses.
- Mosquitoes can carry West Nile virus.
- Both are a threat to you and your pets.

PROTECT YOUR HOME YEAR-ROUND

Pests and wildlife start looking for food and shelter as cooler weather approaches.

Routine protection now can prevent bigger problems later.

FOR OUR BAT REMOVAL CUSTOMERS:

If your home is currently covered under the first year of your Bats & Bugs Pest Solutions bat exclusion warranty, you can extend that warranty simply by enrolling in one of our pest treatment plans.
Protect your home from common pests while keeping your bat exclusion warranty active beyond the initial coverage period. It's an easy way to add year-round protection and extra peace of mind.
